

## 12V Vehicle Jump Starter

Never be left without the power you need, with the UTILUX jump starter. This unit is small and lightweight but packs enough power to jump start your 12 volt vehicle when there is not enough power in the battery.

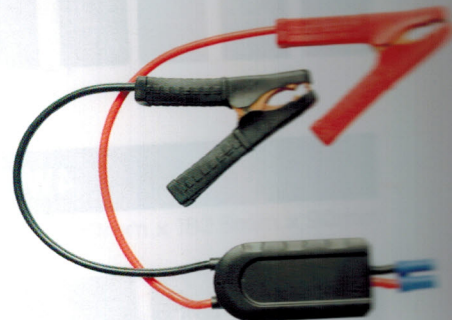

Not only that, but this powerful device is also designed to act as a power bank to your mobile devices including mobile phone, gaming machines and portable computers via the twin USB charging points.

This safety device also comes with a built in flash light to enable you to operate the jump starter without the need for external lighting.

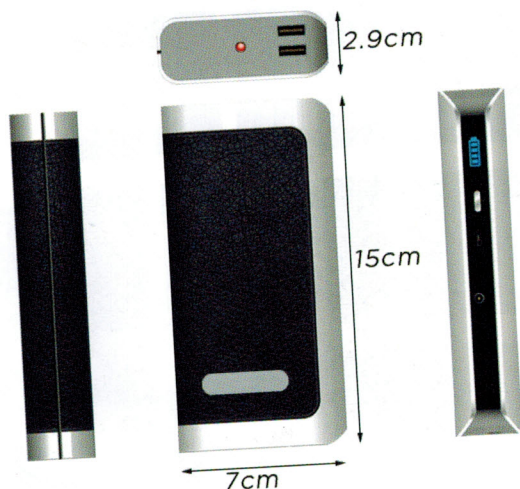

### USB device Charging

- iPod / iPhone / Pao
- Mini-USB Smartphones
- USB Charging Tablets
- Handheld devices
